The Helmholtz Legacy in Physiological Acoustics - Erwin Hiebert 2014-06-12 This book
explores the interactions between science and music in the late nineteenth- and early twentieth century. It examines and evaluates the work of Hermann von Helmholtz, Max Planck, Shohé Tanaka, and Adriaan Fokker, leading physicists and physiologists who were committed to understanding crucial aesthetic components of the art of music, including the standardization of pitch and the implementation of various types of intonations. With a mixture of physics, physiology, and aesthetics, author Erwin Hiebert addresses throughout the book how just intonation came to intersect with the history of keyboard instruments and exert an influence on the development of Western music. He begins with the work of Hermann von Helmholtz, a leading nineteenth-century physicist and physiologist who not only made important contributions in vision, optics, electrodynamics and thermodynamics, but also helped advanced the field of music theory as well. The author traces the Helmholtzian trends of thought that become inherently more complex by reaching beyond the sciences to perform a bridge with aesthetics and the diverse ways in which the human mind interprets or is taught, in different cultures, to interpret and understand music. Next, the author explores the works of other key physicists and physiologists who were influenced by Helmholtz and added to his legacy. He examines Japanese music theory student Shohé Tanaka, who sought to design a harmonium that was not based on equal temperament but rather on just intonation. Dutch physicist Adriaan Daniel Fokker, who arranged for organs to be built based on 31-tones per octave, orchestrated concerts for these new instruments and even attempted to compose microtonal music, or music whose tonality is based on intervals smaller than the typical twelve semitones of Western music.

Traditional Ballad Airs-William Christie
Excerpt from Traditional Ballad Airs: Arranged and Harmonised for the Pianoforte and Harmonium, From Copies Procured in the Counties of Aberdeen, Banff, and Moray

The Editor, in the short preface given in the first volume, remarked that he considered it unnecessary to reiterate what has been so well written by others on Ballads and Ballad Music; and, therefore, as he can give nothing new on the subject, farther than the illustration he has given in the two volumes of this work, he thinks he may use one word from the inscription on the tomb of Sir Christopher Wren, in St. Paul's Cathedral, circumspice. Much is now talked of as to poetry being the language of nature, and ballads being the originals of all history, both sacred and secular. Doubtless the ballads sung on the banks of the Tiber may have been used for the earlier pages of Livy's History; and the ballads about Wallace and Bruce may record their achievements, for man cannot help recording events in poetry, if he has a poetical mind. And so, some historical critics suppose, that the book of Jasher was a ballad-book recording the early history of the Israelites but it does not follow that this ballad-book is the original of the most ancient and sacred history, which has been such a comfort to all who believe in it. The Editor has long been of Opinion, from all he has discovered, that ballads are almost worthless as a true record of historical events. They refer to events, but the events are so distorted in them, as to show their want of authenticity to prove the whole of the historical facts to which they refer. They are merely impressions on the minds of the populace at the time the events happened, according to the varied circumstances reported, and in passing from one person to another, no two persons almost are found to recite a traditional ballad in the same form, or give exactly the same circumstances. There are about a dozen airs in the volumes, different sets of which were given in Johnson's Museum. When the Editor consulted his friend the late Dr. Laing, who knew more about ballads and ballad music than any other person in Scotland, he quite agreed with him in his opinion that the original copies of traditional Airs can scarcely be found unless got from the
original composer, seeing that they pass through so many persons until they are noted by the collector of them. A Large Harmonium-Sue Sorensen 2011-08 English Lit professor Janey Erlicksen wonders if she's coming unravelled, as her daily life progresses through the onslaught from work, friends and family, and her despotic toddler Little Max. Janey knows she should be trying to put her academic career on the map, but how? She'll more readily poke fun at than engage in yet another overly dry and theoretical conference. And her husband and their friends simply encourage her off the serious academic path, providing anarchic ideas from Foucault-in-snowsuits to erotic poetry addressed to the harmonium collecting dust in the music department. A Large Harmonium is a sharply comical year-in-the-gloriously-unruly-life story. We follow Janey as she negotiates motherhood (“Little Max is a Roald Dahl story, I decide”); career (“the whole enterprise starts to resemble a lion-taming act without the lions”); frightful in-laws (“At breakfast, the two of them are serene and fit-looking. I never can see how people look like that in the morning”); and which literary hero her husband Hector most resembles (“Rochester! Why should I be Rochester? He's a bastard. And he has to be blinded and lose an arm or something before he can be tamed.”) Along the way, she relies on Hector, boy-wonder babysitter Rene, and even crazy unreliable friend
Jam. And on Jake, the understanding minister who helps her pick her way through it all.

**Stigmas of the Tamil Stage**-Susan Seizer
2005-03-21 A study of the lives of popular theater artists, Stigmas of the Tamil Stage is the first in-depth analysis of Special Drama, a genre of performance unique to the southernmost Indian state of Tamilnadu. Held in towns and villages throughout the region, Special Drama performances last from 10 p.m. until dawn. There are no theatrical troupes in Special Drama; individual artists are contracted “specially” for each event. The first two hours of each performance are filled with the kind of bawdy, improvisational comedy that is the primary focus of this study; the remaining hours present more markedly staid dramatic treatments of myth and history. Special Drama artists themselves are of all ages, castes, and ethnic and religious affiliations; the one common denominator in their lives is their lower-class status. Artists regularly speak of how poverty compelled their entrance into the field. Special Drama is looked down upon by the middle- and upper-classes as too popular, too vulgar, and too “mixed.” The artists are stigmatized: people insult them in public and landlords refuse to rent to them. Stigma falls most heavily, however, on actresses, who are marked as “public women” by their participation in Special Drama. As Susan Seizer’s sensitive study shows, one of the primary ways the performers deal with such stigma is through humor and linguistic play. Their comedic performances in particular directly address questions of class, culture, and gender deviations—the very issues that so stigmatize them. Seizer draws on extensive interviews with performers, sponsors, audience members, and drama agents as well as on careful readings of live Special Drama performances in considering the complexities of performers’ lives both on stage and off.

<th>2019-10 Why do we send children to school? Who should take responsibility for children's health and education? Should girls and boys be educated separately or together? These questions provoke much contemporary debate, but also have a longer, often-overlooked history. Mary Hatfield explores these questions and more in this comprehensive cultural history of childhood in nineteenth-century Ireland. Many modern ideas about Irish childhood have their roots in the first three-quarters of the nineteenth century, when an emerging middle-class took a disproportionate role in shaping the definition of</th>

a 'good' childhood, with childhood seen as a fluid concept with a variety of meanings and responsibilities dependent on class, gender, and religious identity. This study deconstructs several key changes in medical care, educational provision, and ideals of parental care. It takes an innovative holistic approach to the middle-class child's social world, by synthesising a broad base of documentary, visual, and material sources, including clothes, books, medical treatises, religious tracts, photographs, illustrations, and autobiographies. It offers invaluable new insights into Irish boarding schools, the material culture of childhood, and the experience of boys and girls in education.

Hindustani Traces in Malay Ghazal-Chinthaka Prageeth Meddegoda 2016-09-23 ‘A song, so old and yet still famous’ is a Malay expression of admiration for an exotic singing style, a musical contemplation on the beauty of nature, God, and love. The ghazal exists in manifold cultures all over Asia, Africa, and Southern Europe, and is intimately connected to Islam and its periphery. In each region, ghazals have been shaped into other expressions using imported features and transforming them into ‘local art’. In the Malay world, ghazals come in various shapes and with different meanings. ‘The song, so old’ is the song that came before the proliferation of mass media. The first ghazals that were heard in the Malay world might have been those ghazals performed by Hindustani musicians traveling in Southeast Asia. However, later on, the ghazal’s development was additionally triggered by mass media, with technological progress enhancing change in urban entertainment and introducing new sources of further adaptations. In this context, the second half line of the lyrics mentioned, ‘and yet still famous’, means that despite being old, the song is highly regarded as an art in itself. Malay ghazals are still attractive and musically demanding. They were traditionally not performed for mass appeal, but, rather, for a small knowledgeable audience that valued musical refinement and taste.

A Dictionary of Music and Musicians (1480-1880)-José Alexander Maitland 1879

Dangdut Stories-Andrew N. Weintraub 2010-09-21 A keen critic of culture in modern Indonesia, Andrew N. Weintraub shows how a genre of Indonesian music called dangdut evolved from a debased form of urban popular music to a prominent role in Indonesian cultural politics and the commercial music industry. Dangdut Stories is a social and musical history of dangdut within a range of broader narratives about class, gender, ethnicity, and nation in post-independence Indonesia (1945-present).

And Yet It Is Heard-Tito M. Tonietti 2014-05-16 We bring into full light some excerpts on musical subjects which were until now scattered throughout the most famous scientific texts. The main scientific and musical cultures outside of Europe are also taken into consideration. The first and most important property to underline in the scientific texts examined here is the language they are written in. This means that our multicultural history of the sciences necessarily also becomes a review of the various dominant languages used in the different historical contexts. In this volume, the history of the development of the sciences is told as it
happened in real contexts, not in an alienated ideal world.

**Notes from a Wayfarer**- 2016-11-29 Helmut Thielicke was one of the most read and most listened to theologians of the twentieth century. Like few others, he repeatedly came down from the ivory tower of academic religion in order to build bridges between the church and the world. In his autobiography, written in 1983, Thielicke sets forth his memoirs from a long and full life. His narrative is filled with deeply thoughtful reflections about the poignancy of life, told with a delightful humour that invites us into every story and encounter. Thielicke also introduces us to the figures he counted among his friends and acquaintances: Karl Barth, Konrad Adenauer, Dietrich Bonhoeffer, Dwight Eisenhower, Helmut Kohl and Jimmy Carter. Thielicke was a witness to many of the most significant events of our century; his life history is interwoven with the imperial era, the Weimar Republic, the rise of the Third Reich, a divided Germany, and the tumultuous 1960s. From the perspective of this single life we are afforded a broad and clear vision of the moments that have shaped the generation leading us into the twenty-first century.

The Organ As a Mirror of Its Time: North European Reflections, 1610-2000 Text & CD
University of Rochester Kerala J. Snyder
Professor Emerita of Musicology at The Eastman School of Music 2002-06-28
Because it has always represented a rich collaboration of the music, art, architecture, handicraft and science of its day, the organ, more than any other instrument, continues to reflect the spirit of the age in which it was built. The Organ as a Mirror of Its Time, the first book to consider this instrument's historical and cultural significance, reflects the efforts of twenty leading scholars of the organ. The book chronicles the history of six organs in Scandinavia and Northern Germany, at least one specimen for every century from 1600 to the present. By considering their original contexts and their histories since they were built, as well as the extraordinary coincidences that link them together, the book offers a unique perspective on the cultural history of northern Europe. A CD with appropriate repertoire played on each of the six instruments accompanies the book.
